DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by SINDERBY (WO 02/056818).

The Sinderby reference discloses a respiratory system (see Fig. 1) comprising a CPU 20 that acts as both a calculator and a controller for controlling a level of ventilation assist via ventilation tube 34 based on electrical signals from measurement probe 12 which are proportional to the fatigue of a respiratory muscle or diaphragm.

In regard to claims 1-9, the method as claimed would be inherent during normal use and operation of the device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Steven O. Douglas/ whose telephone number is (571) 272-4885.

The examiner can normally be reached on Mon-Thurs 6:30-5:00.
